TRAFFIC ANALYSIS SURVEY
NORTH VIETNAM, LAOS AND CAMBODIA

The IBM listings of the Traffic Analysis Survey are prepared by NPIC for distribution on a weekly basis and are cumulative from 6 March 1964.

The Traffic Analysis Survey is based on specific motorable routes in Southeast Asia, however, when traffic is observed on an unnumbered route, the entry "UNN" appears under the column "Route Segment". Each listing consists of two parts presented in the following sequence:

Route Segment	Part I
Date of Information	Part II

All columns are labeled and are self-explanatory except for the route and segment numbers which are explained in a separately distributed route-segment key.

Previous publications of the Traffic Analysis Survey provided for two additional parts; Country and Coordinates. These parts will no longer be carried in this report; however, IBM listings may be obtained for these parts on a demand non-scheduled basis.
